With sales into more than 170 countries, JohnsonDiversey provides customers worldwide with the products, solutions and expertise to make their facilities the safest and cleanest in the world.

Our product & program categories include:

- Floor Care
- Food Safety/Food Service
- Washroom Care
- Housekeeping Cleaners & Disinfectants
- Laundry
- Personal Care
- Kitchen Hygiene

Our Statement

Clean is the centre of who we are and what we do. It means hygienic, ethical, environmentally sound and excellence without compromise. Beyond *clean* is the host of services, ideas and opportunities we bring to our customers, our communities and our people. It means that JohnsonDiversey thinks plans and acts for the long term.

The Environment - A Heritage of Responsibility

JohnsonDiversey has been dedicated to leadership in environmental, health, safety and product excellence since the company was founded in 1886. As a cleaning chemical manufacturer, our aim is to continually minimise the impact our product development, manufacturing and delivery process have on human health and the environment.

Environmental sustainability is a responsibility we share with our customers and others with whom we work. Everything we do from the ground up is a reflection of our commitment to be a true environmental leader.

Environmental Excellence - Innovative Products & Dispensing Solutions

We are designing better, more cost effective products, services and dispensing systems. Many of our products are highly concentrated. This reduces packaging material that would be used to manufacture containers for the non-concentrated amount.

Our dispensing systems provide simple, safe and accurate mixing that dramatically reduces chemical waste. Our long standing role as a leader in dilution control technology continues today with advances in J-Flex and innovative Divermite and JFill dispensing systems that simplify dilution control with an environmentally responsible design that significantly reduces chemical and packaging waste. JohnsonDiversey is making it easier and more affordable for customers of all sizes to reduce their environment footprint.

J-flex

JFill

Divermite

- ✓ **Super Concentrated formulas = lower chemical usage**
- ✓ **Less packaging waste compared to ready-to-use products**
- ✓ **Reduced transportation costs**
- ✓ **Environmentally Preferred Products**
- ✓ **Accurate delivery system gives consistent performance & costs**
- ✓ **Elimination of product over-use & spillage**

Green Seal Certified Products

Several of JohnsonDiversey products have earned the **Green Seal** logo, awarded to products that have a minimal impact on building occupants and the outdoor environment while still delivering high performance. To earn Green Seal certification our products and manufacturing practices must meet the Green Seal's standards and demonstrate performance through rigorous evaluation and testing. The evaluation considers energy, resource use and emissions to air, water and land as well as other environmental and health impacts.
